HOW TO SOLVE NUMBER FILL-INS

A Number Fill-In is solved just like a regular Fill-In, using numbers instead of words. Across and down entries cross each other. Each digit in an across entry is part of a down entry. We provide you with the lists of numbers, arranged numerically by length. To solve a Fill-In, start with the given number in the diagram and look for possible crossings. Lightly pencil in one choice from the List. Now, look at the List and check to see if there are entries in the List that can cross your penciled-in choice. For example, if your penciled-in number starts with a "6," be sure there is a crossing entry with a "6" in the correct position. If there isn't, pencil in another possibility. Continue until you are sure that your number is the one that fits there. Then, cross off that choice from the List. As you solve, the List gets smaller and solving is faster. We know that you'll find these puzzles a relaxing diversion and a pleasant challenge. ***Happy solving!***

Three holiday treasures in one ... exclusively from Bradford Editions!

The "Thomas Kinkade White Christmas" Masterpiece Edition Crystal Snowman features hand-crafted crystal, an illuminated village sculpture and a ***moving*** holiday train ... for the first time ever! This snowman stands an impressive 11 inches high to let his personality come shining through. A hand-painted, 3-D Thomas Kinkade village, tucked within the crystal outer shell, makes this snowman a holiday treasure inside and out. There's a lighted church, cozy homes and shops, plus a locomotive train that circles around below on the base! Just flip the switch to set the holiday train in motion. The silvery scarf, mittens, lantern and name plaque, glittering snow and more make this grandly sized sculpture truly magnificent.
